Electric Heater

DH-QNK07

Instruction Manual

Made in China

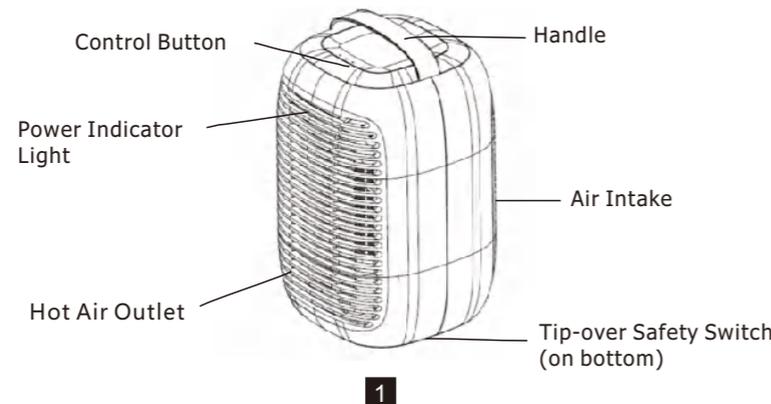

Thank you for choosing our product. Please read this manual carefully before using it.

Product description:

The electric heater (Here in after referred to as heater) is a simple and stylish design. It's equipped with 1 switch on the rear bottom, 4 buttons on the top and front indicator light (Dark red refers to high heating node and light red refers to low heating mode, while blue light refers to fan mode). The heater is powerful to provide strong heat, and works quietly. The auto-off technology guarantees the safety in case it's tipped over accidentally. What's more, the heater can swing to heat a wider area. There's a handle at the backside, which makes it easy to carry. The heater is convenient to use both at home and office.

Working Theory:

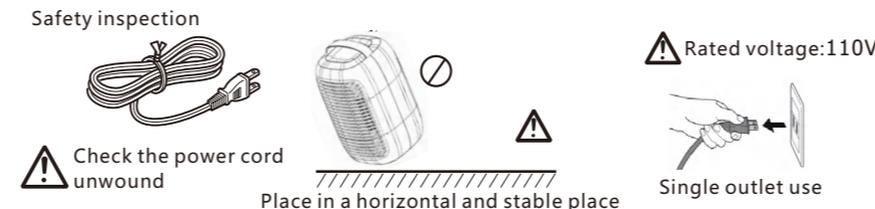

The heater uses the PTC as the thermal unit, which has the advantages of fast heating, high conversion rate, long lifetime, no naked fire and oxygen consumption free. It's perfect for home an office use.

Specifications:

Name: Electric Heater
Model:DH-QNK07
Electric shock class:II
Rated voltage:110V~
Rated Frequency :60Hz
Rated power:950W

Confirmation before use:

Notice:

1. Do not place the heater near the curtain or something else which is easy to be sucked in. Do not put it at any unstable place or place with obstacle;
2. Do not use the heater in the inflammable and explosive environment. The room temperature should not be above 30°C. To prevent the fire accident, please keep the heater away from inflammable objects at least 1 meter;
3. Do not put your finger or any object into the heater while it is working;
4. The protection net is used to separate the heater unit from the user. When the heater is working, the protection net must be installed properly. The protection net cannot provide overall protection to children and disabled people;
5. Keep the heater out of reach of the people of disability, sensory handicaps, intellectual deficiency or lack of experience and general knowledge (including children), except the usage is fully under the watch and guard by their guardians;
6. If you want to move the heater, please make sure it's disconnected with power;
7. Do not touch the plug with a wet hand in case of electric shock;
8. Do not use the heater in or around these places: bathtub, sprayer or swimming pool etc;
9. Do not use the heater in condition of high temperature, humid, dusty or volatile place of acid, alkali and oil.

Maintenance:

- Please switch off and plug out the heater before maintenance:
1. Any oil dirt found on the main body must be cleaned up immediately, otherwise it may fade or damage the heater;
 2. Clean the heater with the neutral detergent and then wipe with the soft cloth;
 3. After cleaning, pack it well in the package box, and put it in the dry place;
 4. Only clean the outer cover of the heater;
 5. Don't spray the heater with water directly. It is forbidden to clean with detergent of acid or alkali, otherwise it may fade or damage the heater.
